

Take part in the

platy project!

Have you ever seen a platypus in the wild?

It's a magical moment when this strange and adorable animal emerges from ripples in the water.

This spring from September into October we're asking people to head down to the nearest creek or river, find a quiet place on the bank, **try to spot a platypus** and record what they see as part of the platy-project.

By taking part, you'll help researchers understand more about this elusive animal, and how we can better protect it.
